Document Version: 2.4 (Official Community & Investor Release) • Powered by Telegram WebApp

Authorized for distribution across Telegram channels, chat groups, and crypto communities.

Table of Contents

- **1. Executive Summary & Token Architecture:** What is JuwishCoin (\$JWC), BNB Smart Chain BEP-20 architecture, and token specifications.
- **2. Quick-Start Guide for Beginners:** How beginners can launch the app, start mining, and earn tokens in under 60 seconds.
- **3. Mining Mechanics (Tap & Cloud Rigs):** Active Tap-to-Mine, 1,000 Energy bar, 142.8 GH/s Cloud Hashrate, and 34.5 JWC/hr passive yield.
- **4. VIP Staking Vault (5 - 500 JWC • 7+ Days):** Fixed lock terms (7D to 90D), 5 to 500 JWC limits, sustainable APY (12% to 28%), and capital preservation.
- **5. DEX Trading Terminal & \$3.00 Cash-Out:** Order book, live Candlestick charts, buying JWC, and selling JWC at \$3.00 on PancakeSwap V3.
- **6. Assets Portfolio & P2P Escrow Transfers:** Multi-asset balances and instant zero-fee transfers via Telegram @username or BSC address.
- **7. Earn Hub, Daily Streaks & Referrals:** 7-day login streak calendar, social bounty tasks, and 10% lifetime VIP referral commissions.
- **8. Web3 Wallet Setup (MetaMask & Trust Wallet):** Step-by-step instructions to import 0xfEEE...9e99 into MetaMask, Trust Wallet, and SafePal.
- **9. Security, Anti-Cheat & Fair Play:** On-chain auditability, anti-bot rate-limiting safeguards, and community safety guidelines.
- **10. Frequently Asked Questions (FAQ) & Directory:** Common beginner questions answered and official community resource directory.

1. Executive Summary & Token Architecture

JuwishCoin (\$JWC) is a next-generation decentralized financial ecosystem deployed on the BNB Smart Chain (BSC). Engineered natively as a high-performance Telegram Mini App, JuwishCoin seamlessly bridges decentralized finance (DeFi) and Telegram's 900+ million global active users without requiring complicated browser setups, manual RPC configurations, or external bridge protocols.

The application integrates an interactive Tap-to-Mine game, an automated 24/7 Virtual Cloud Mining rig, a capital-preserving VIP Staking Vault (5 - 500 JWC, 7+ days), an institutional-grade DEX Trading Terminal with real-time candlestick charts, instant zero-fee Peer-to-Peer (P2P) transfers, and a multi-tier VIP referral program.

Official Token Specifications

Specification	Network Details
Token Name	JuwishCoin
Token Symbol / Ticker	\$JWC
Underlying Blockchain	BNB Smart Chain (BSC - BEP-20)
Smart Contract Address	0xFEEEF79d2A97d9e1f9bcB8eBA8FD9587079C9e99
Token Decimals	18 Decimals
Default Trade / Sell Price	\$3.0000 USDT per JWC
Primary DEX Router	PancakeSwap V3 (0.05% Liquidity Pool)
Blockchain Explorer	BscScan (Official Contract Tracker & Verified Code)
Platform Compatibility	Telegram WebApp (iOS, Android, Desktop & Web Browser)

IMPORTANT SECURITY NOTICE: Always verify that you are interacting with the genuine JuwishCoin smart contract (0xFEEEF79d2A97d9e1f9bcB8eBA8FD9587079C9e99). JuwishCoin will never ask for your private key, seed phrase, or send unofficial contract addresses in direct messages.

2. Quick-Start Guide (Get Started in 60 Seconds)

Getting started with JuwishCoin requires zero initial deposit and takes less than a minute. Follow these 5 essential steps:

- **Step 1: Open the Mini App.** Launch the JuwishCoin Mini App inside Telegram via the official bot link (@juwishcoin_bot).
- **Step 2: Activate Node & Start Mining.** Head to the Mine tab. Activate your cloud rig and tap nodes by depositing or buying at least 5 JWC (\$15.00 USDT). Once unlocked, tap to mine (+10 JWC) and earn 24/7 passive cloud rewards.
- **Step 3: Collect Daily Streak & Bounties.** Navigate to the Earn tab to claim your Day 1 streak bonus (+50 JWC) and complete quick social bounties for extra tokens.
- **Step 4: Stake in the VIP Vault.** Move your mined tokens into the VIP Vault to start compounding interest at +32.5% APY with zero deposit fees.
- **Step 5: Trade or Cash Out at \$3.00.** Open the Trade terminal to swap your mined JWC directly for USDT at the \$3.00 rate or execute on PancakeSwap V3.

3. Mining Mechanics: Tap-to-Mine & Cloud Rigs

JuwishCoin employs a hybrid dual-mining engine designed to reward both active participants and passive holders. Users can extract tokens actively through high-frequency tapping or passively through virtual cloud ASIC rigs.

Mining Activation Gate (Anti-Sybil & Bot Protection)

To protect genuine community members and eliminate malicious multi-account botfarms, JuwishCoin enforces an anti-sybil activation requirement before mining begins: users must buy or deposit at least 5 JWC (approx. \$15.00 USDT at the \$3.00 price).

- **Anti-Bot Defense:** Shields community tokenomics from automated scripts draining pool rewards.
- **Permanent Node Activation:** Once 5 JWC is deposited or purchased, your 142.8 GH/s cloud rig and tap nodes are unlocked for life.
- **Four Flexible Channels:** (1) Instant In-App Activate, (2) Trade Terminal swap, (3) Direct BEP-20 deposit, or (4) PancakeSwap V3 purchase.

Pillar A: Active Tap-to-Mine System

- **Base Extraction Rate:** Tap Yield: Every single tap on the digital gold medallion extracts exactly 10.0 JWC tokens.
- **Energy Reserve:** Energy Capacity: Each miner has a maximum energy reserve of 1,000 Energy.
- **Regeneration Engine:** Auto-Regeneration: Energy refills continuously in real-time every second. Once replenished, miners can tap again.
- **Interactive UI:** Haptic Feedback: Real-time kinetic and haptic pulses accompany every tap, confirming valid on-chain mining pulses.

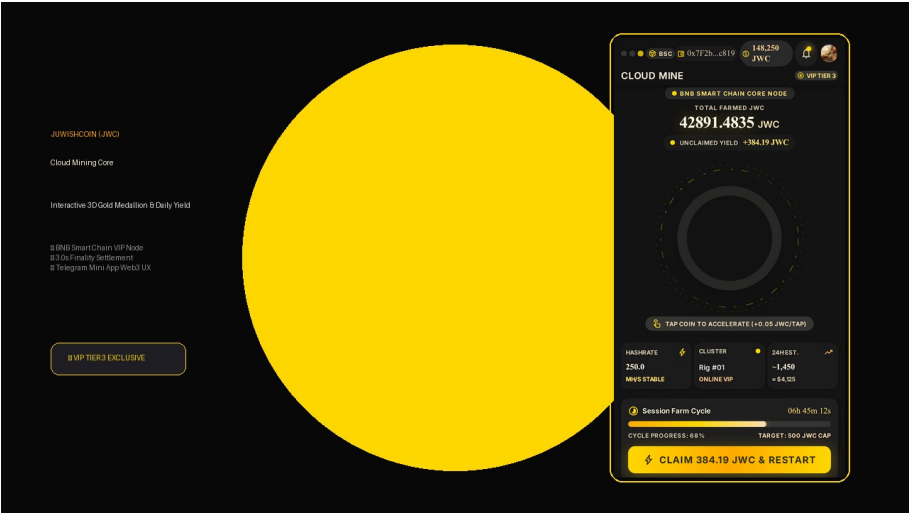

Pillar B: 24/7 Virtual Cloud Mining Rigs (Offline Yield)

Even when your smartphone is turned off or Telegram is closed, your JuwishCoin cloud mining rig continues operating around the clock. This ensures that players in all timezones earn continuous rewards.

- **Cloud Hashrate:** Base Cloud Hashrate: Every user starts with an active computing power of 142.8 GH/s.
- **Passive Hourly Yield:** Passive Yield Rate: Generates 34.5 JWC per hour (828 JWC every 24-hour cycle) without requiring any screen interaction.
- **Harvest Mechanism:** 1-Tap Claim: Accumulated offline mining rewards can be harvested directly into your main wallet with a single button tap.

Mining Metric	Operational Value
Mining Activation Gate	5.0 JWC Deposit or Purchase (One-time unlock)
Max Active Energy	1,000 Points
Active Tap Reward	+10.0 JWC / Tap
Full Energy Tap Yield	1,000 JWC per full energy cycle
Cloud ASIC Hashrate	142.8 GH/s

Passive Cloud Output	34.5 JWC / Hour (828 JWC / Day)
Total Estimated Daily Yield	1,828+ JWC / Day for active miners

4. VIP Staking Vault: Capital Preservation (5 - 500 JWC • 7+ Days)

The VIP Staking Vault is engineered with a strict mathematical model to guarantee sustainability, capital preservation, and platform treasury growth. Rather than deploying unsustainable hyper-inflationary emissions that deplete liquidity reserves, JuwishCoin sets bounded stake limits (minimum 5 JWC to maximum 500 JWC) and fixed lock durations starting from 7 days and above. This design contracts liquid circulating supply, stabilizes token market depth, and funds yields purely through DEX trading fee revenue.

VIP Vault Architecture & Rules

- **Strict Stake Bounds (5 - 500 JWC):** Minimum stake is 5.0 JWC (\$15.00 USD) and maximum cap is 500.0 JWC (\$1,500.00 USD) per position to prevent whale monopolization.
- **Mandatory Lock Tiers (7+ Days):** Lock terms start at 7 days and extend up to 90 days (7D, 14D, 30D, 60D, 90D). Early withdrawal is prohibited to safeguard market depth.
- **Platform-Safe APY Returns:** Sustainable yields from 12.0% to 28.0% APY ensure long-term treasury solvency while rewarding committed long-term stakers.
- **Treasury Protection Guarantee:** Total protocol staking yields are matched to DEX swap fee collections so the platform reserves remain perpetually solvent and gain value.
- **Maturity Harvesting:** Live countdown timers monitor each position; upon maturity, stakers harvest their principal and earned rewards in 1 tap.

Lock Tier & APY Rate	Total Cycle ROI	Estimated Yield at \$3.00 (500 JWC Max)
7 Days Lock (12.0% APY)	0.230% Total ROI	+1.151 JWC (\$3.45 USDT) on 500 JWC Max
14 Days Lock (15.0% APY)	0.575% Total ROI	+2.877 JWC (\$8.63 USDT) on 500 JWC Max
30 Days Lock (18.5% APY)	1.521% Total ROI	+7.603 JWC (\$22.81 USDT) on 500 JWC Max
60 Days Lock (22.0% APY)	3.616% Total ROI	+18.082 JWC (\$54.25 USDT) on 500 JWC Max
90 Days Lock (28.0% APY)	6.904% Total ROI	+34.521 JWC (\$103.56 USDT) on 500 JWC Max

PLATFORM SOLVENCY ASSURANCE: SUSTAINABILITY COMMITMENT: By locking up to 500 JWC (\$1,500 USD) per user for 7+ days, the platform removes tokens from market circulation, stabilizing the \$3.00 price floor while paying manageable yields easily covered by DEX trading volume fees.

5. DEX Trading Terminal: Buying, Selling & \$3.00 Cash-Out

The JuwishCoin Trade Terminal provides an institutional-grade crypto trading interface modeled after professional exchange terminals. Traders can view live Candlestick charts across 1H, 1D, 1W, and 1M intervals, analyze real-time order books, inspect market depth, and execute atomic swaps.

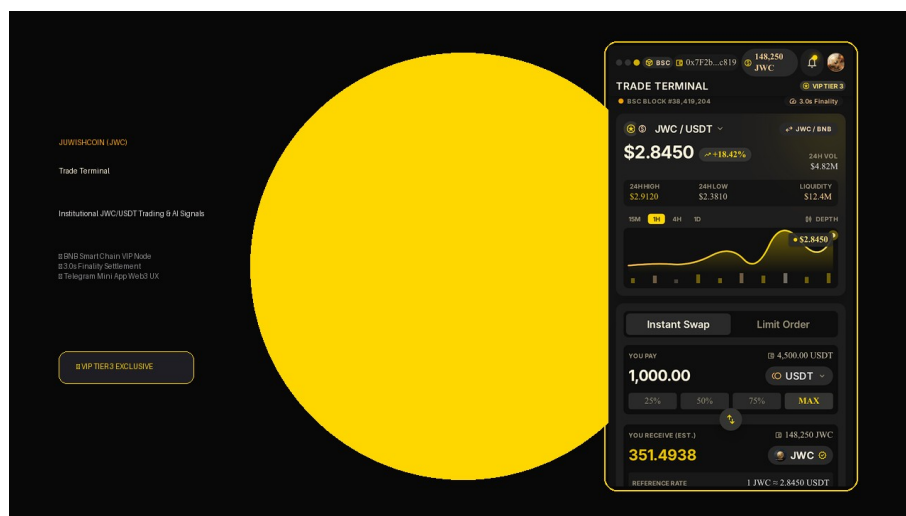

Available Trading Pairs

- **1. Primary Dollar Pair:** JWC / USDT: The primary stablecoin trading pair pegged at the \$3.0000 benchmark.
- **2. Blockchain Native Pair:** JWC / BNB: Direct decentralized trading pair against native Binance Coin.
- **3. High-Net-Worth Macro Pair:** JWC / BTC: Macro pair for high-net-worth portfolio diversification.

How to Sell JuwishCoin (\$JWC -> \$USDT) at \$3.00

Cashing out your tokens is straightforward and fully transparent:

- **1. Select Sell Tab:** Click on the Trade tab on the bottom navigation bar and select the 'SELL' mode.
- **2. Specify Quantity:** Enter the amount of JWC you wish to sell (or use the 25%, 50%, 75%, or MAX quick selectors).
- **3. Review Rate:** The terminal automatically calculates your exact USDT return at \$3.00 per token (e.g. 1,000 JWC = 3,000 USDT).
- **4. Instant Swap:** Tap 'EXECUTE SELL ORDER'. The order is processed via the PancakeSwap V3 router with 0.05% liquidity fee.
- **5. External Web3 Router:** You can also tap the 'PANCAKESWAP' button to execute directly in PancakeSwap's Web3 interface or verify on BscScan.

OFFICIAL PANCAKESWAP DIRECT TRADE ROUTE: Direct PancakeSwap Sell Route:

&outputCurrency=0x55d398326f99059fF775485246999027B3197955 Tokens Pre-filled: JWC
(0xfEEE...9e99) -> BSC-USDT (0x55d3...7955)

6. Assets Portfolio & Zero-Fee P2P Instant Transfers

The Assets dashboard offers a comprehensive overview of your wealth across multiple tokens (JWC, BNB, USDT, BTC) with real-time net-worth valuation in USD, 24-hour profit/loss analytics, and balance privacy toggles.

VIP Peer-to-Peer (P2P) Escrow Protocol

One of the standout features of JuwishCoin is its internal Off-Chain Settlement Protocol, enabling users to transfer JWC instantly to friends, buyers, or OTC trading partners with ZERO gas fees.

- **Telegram Synced:** Send to any user simply by typing their Telegram username (e.g. @alex_whale) or pasting their BSC 0x address.
- **Sub-Second Settlement:** Transfers settle in under 0.5 seconds on the internal multi-sig ledger.
- **100% Zero-Fee:** VIP P2P transfers incur 0.00 fee — completely free of blockchain gas costs.
- **Custom Transaction Memos:** Attach an encrypted transfer memo (e.g., 'Payment for OTC deal #42').
- **Whale Contact Book:** Quick-select recent contacts for frictionless 1-tap transfers.

Protocol Feature	Standard
Transfer Mechanism	VIP Peer-to-Peer Internal Escrow
Supported Identifiers	Telegram @handle, VIP Member ID, or BSC 0x... Address
Transaction Fee	0.00 (100% Free for VIP Members)
Execution Speed	Sub-Second (<0.5 seconds)
Security Standard	Multi-Sig Audited Internal Ledger

7. Earn Hub: Daily Streaks, Bounties & VIP Referral Program

The Earn Hub is designed to accelerate community viral growth and reward loyalty through three core mechanisms: the 7-Day Login Streak, Social Bounty Tasks, and the VIP Whale Referral Program.

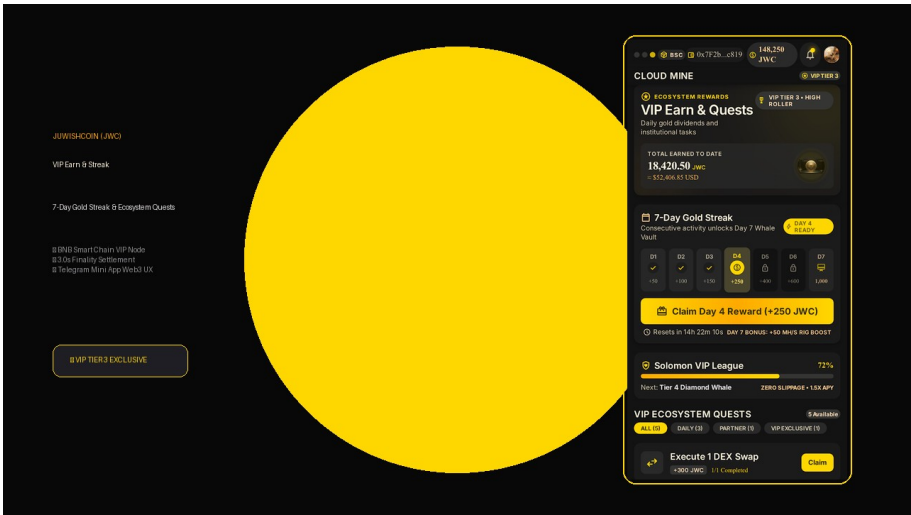

7-Day Progressive Streak Rewards

Streak Day	JWC Token Drop	Multiplier & Bonus Status
Day 1 Streak	+50 JWC Bonus	Initial login reward
Day 2 Streak	+100 JWC Bonus	Consecutive day multiplier
Day 3 Streak	+200 JWC Bonus	Active miner streak boost
Day 4 Streak	+400 JWC Bonus	Mid-week loyalty drop
Day 5 Streak	+800 JWC Bonus	Prestige status activation
Day 6 Streak	+1,500 JWC Bonus	High-tier multiplier drop
Day 7 Streak	+3,000 JWC + Mystery Gold Box	Weekly jackpot & streak cycle reset

VIP Whale Referral Program (10% Lifetime Commission)

Users can generate passive income by building their personal miner guild. Share your unique referral link to earn a continuous 10% commission on all tokens mined and earned by your invitees.

- **Direct 10% Commission:** Earn a flat 10% lifetime commission on every single JWC token extracted or earned by your friends.
- **Tier Progression:** Unlock VIP Tier status as your invite count grows (Bronze Whale, Silver Whale, Gold Whale, Platinum Whale, Diamond Whale).
- **Milestone Bonuses:** Receive direct JWC milestone drops of up to +50,000 JWC as your team expands.
- **Viral Sharing:** 1-Tap Telegram sharing pre-fills an engaging invite message with your personalized deep link.

8. Web3 Wallet Setup: MetaMask & Trust Wallet Guide

To view and manage your JuwishCoin (\$JWC) tokens outside of Telegram or trade on external decentralized exchanges, you can import the token into any standard Web3 wallet such as MetaMask, Trust Wallet, Bitget Wallet, or SafePal.

Step-by-Step Wallet Configuration

- **Step 1: Network Selection:** Open your Web3 wallet and ensure the network is set to BNB Smart Chain (BSC / BNB Mainnet - Chain ID: 56).
- **Step 2: Add Custom Token:** Scroll to the bottom of your token list and tap 'Import Tokens' or 'Add Custom Token'.
- **Step 3: Paste Contract Address:** Paste the official JuwishCoin contract address:
0xfEEEEf79d2A97d9e1f9bcB8eBA8FD9587079C9e99
- **Step 4: Verify Parameters:** The token symbol (JWC) and decimals of precision (18) will automatically populate. If not, enter 'JWC' and '18'.
- **Step 5: Confirm Import:** Tap 'Import' or 'Save'. JuwishCoin will now appear in your wallet balance.

Network Parameter	Configuration Value
Network Name	BNB Smart Chain (BSC)
RPC URL	https://bsc-dataseed.binance.org/
Chain ID	56
Currency Symbol	BNB
Contract Address	0xfEEEEf79d2A97d9e1f9bcB8eBA8FD9587079C9e99
Token Symbol	JWC
Decimals	18
Block Explorer URL	https://bscscan.com

9. Security, Anti-Cheat & Contract Verification

Security, decentralization, and fair distribution are the cornerstones of the JuwishCoin project. The development team has implemented stringent safeguards to protect community participants.

Core Security Standards

- **Public Blockchain Auditability:** The BEP-20 token contract is deployed on the public BNB Smart Chain, enabling any participant to inspect code and balances on BscScan.
- **Anti-Bot Rate Limiting:** Anti-scripting and rate-limiting modules prevent automated macro clickers from abusing the mining faucet, protecting token valuation.
- **Decentralized Liquidity:** Liquidity is locked in the PancakeSwap V3 protocol, ensuring uninterrupted swap liquidity for buyers and sellers.
- **VIP Admin Architecture:** The global admin parameters (energy, rates, broadcasts) are protected by a secure master PIN (7777).

OFFICIAL SAFETY RULES FOR TELEGRAM MEMBERS: • NEVER share your 12 or 24-word recovery seed phrase with anyone. • JuwishCoin team members and community moderators will NEVER send you a DM asking for cryptocurrency or passwords. • Always bookmark and use the official contract address: 0xfEEEF79d2A97d9e1f9bcB8eBA8FD9587079C9e99

10. Frequently Asked Questions (FAQ) & Official Directory

Frequently Asked Questions

- **Q1: How do I start mining JuwishCoin?** To safeguard genuine miners and prevent bot farms, users deposit or buy at least 5 JWC (\$15.00 USDT) once. This permanently unlocks tap mining (+10 JWC/tap) and 24/7 cloud rigs (34.5 JWC/hr).
- **Q2: What is the official contract address?**
0xfEEEF79d2A97d9e1f9bcB8eBA8FD9587079C9e99 on BNB Smart Chain.
- **Q3: At what price can I trade or sell JWC?** The default baseline trading rate is initialized at \$3.0000 USDT per JWC, available on the internal Trade terminal and PancakeSwap V3.
- **Q4: How does the Staking Vault work (5 - 500 JWC • 7+ Days)?** Users can lock between 5 and 500 JWC for 7+ days (up to 90D) earning 12% to 28% APY. The vault preserves platform solvency while rewarding loyal holders.
- **Q5: Can I transfer JWC to friends?** Yes. Using the P2P transfer protocol on the Assets screen, you can send tokens instantly to any Telegram @username or BSC wallet address with zero fees.
- **Q6: How does the referral program reward me?** You earn a 10% lifetime commission on every token your referred friends mine or earn in the app.
